Weekend Workshop: **Carbon and Nature Consciousness**	Saturday and Sunday evening 7-8:30pm ET January 9 & 10 Via zoom (if there's enough local interest I would do an in-person version) Suggested donation $50 or pay what you can	Over two sessions we will explore carbon, not just as a substance, but as an expression of the Earth's consciousness. Through presentation, meditation, and discussion we will deepen our relationship to the important question of climate change and carbon's activity in our own consciousness living in our blood. This will lead us to look at the connection between nature and our ancestors.
8 Session Course **Seven Sacred Acts of Agriculture**	Thursday evenings 7-8:30pm ET January 21 – March 11 Via zoom Suggested donation $250 or pay what you can	Whatever approach you have to sustainable agriculture, this course will deepen your relationship to the land you steward. The practical work we do with animal husbandry, soil care, seed saving, composting, crop rotations, land management, and community economic relationships; all have a profound meaning to the land we tend and the Earth as a whole.
Ongoing Classes **Tai Chi and Qigong**	**Sunday** mornings 10-11 at Melanie Subject Yoga studio near Elmwood; **Friday** evening 7-8 and **Wednesday** morning 10-11 at Golden Tiger School of Kung Fu in Hanover	The relationship with our bodies is not unlike our relationship with the Earth. Movement practice can open a doorway into a healthy balance between body, soul, and spirit helping us navigate the world.
